

I would like to take a minute to address the Route 9 enhancement project in which Parkville has been exploring concepts that could possibly affect the Post. At the last meeting and shortly afterwards, we became fully aware that Parkville is looking at 6 different options/concepts whereas 3-4 of those concepts could affect the building we just purchased by moving the property about 40 ft North of its current position, and place a new road in its place to reroute the traffic. If you have not seen these concepts you can get onto <https://parkvillemo.gov/main-slider/route-9-downtown-draft-concepts/> At this time, the folks at City Hall are collecting information, data, studies, and public input have stated that they do not have anything ready, but per they estimated plan a final concept will be delivered for approval summer of next year, and by end of 2026 and into 2027 begin with the Route 9 improvements. In the meantime, we need every member of the Post to reach out to City Hall and leave their comments and input. Remember to be respectable and professional.
